### Section VI: Reactivity Data

#### Chemical Stability

#### Conditions to Avoid

Prolonged or excessive heat and/or exposure to air may cause decomposition or oxidation of the material.

#### Incompatible Materials

Avoid contact with strong acids, strong bases, and materials that react with unsaturated hydrocarbons, alcohols, and aldehydes.

#### Decomposition Products

Carbon monoxide, carbon dioxide, and acrid fumes.

#### Hazardous Polymerization

### Section VII: Spill or Leak Procedure

#### For Spill

Small spills should be absorbed by dirt, sand, or other suitable absorbent. Large spills may be pumped into closed containers for recovery or disposal.

#### Waste Disposal Method

Dispose of waste in accordance with all applicable Federal, State, and local laws.

### Section VIII: Special Protection

#### Ventilation

Consult a qualified ventilation expert. Use local exhaust ventilation meeting ACGIH design criteria wherever exposures may occur, such as where material is weighed, poured, mixed, transferred, etc. Ensure there is dilution ventilation

	to minimize or reduce worker exposures.
<b>Respiratory Protection</b>	A respirator is not normally required in areas where local exhaust ventilation meet ACGIH criteria and when the material is handled in closed systems. If vapor concentration is high due to heat, spills, or other emergencies, or if ventilation does not meet ACGIH criterion, use a NIOSH approved organic vapor respirator. For maximum respiratory protection use air-supplied respirators.
<b>Protective Gloves</b>	Avoid contact with skin. Use oil/chemical resistant gloves.
<b>Other Protective Equipment</b>	Wear safety glasses, full face shields, or goggles meeting OSHA design criteria when eye contact might occur.
<b>Handling &amp; Storage</b>	Apply according to good manufacturing and industrial hygiene practices. Do not store in close proximity to heat, sparks, open flames, strong acids, or strong bases. To minimize product degradation, avoid prolonged exposure of the material to air. Keep container tightly closed when not in use.
