3.2 Mixtures
● Material does not meet the criteria of a mixture in accordance with Regulation (EC) No 1272/2008.

Section 4: First-Aid Measures

4.1 Description of first aid measures

Inhalation  ● Move victim to fresh air. Administer oxygen if breathing is difficult. Give artificial respiration if victim is not breathing. Seek medical attention.

Skin  ● For minor skin contact, avoid spreading material on unaffected skin. In case of contact with substance, immediately flush skin with running water for at least 20 minutes. Wash skin with soap and water. Remove and isolate contaminated clothing and shoes. Seek medical attention. Wash contaminated clothing before reuse.

Eye  ● In case of contact with substance, immediately flush eyes with running water for at least 15 minutes. Seek immediate medical attention, preferably with an ophthalmologist. If the physician is not immediately available, eye irrigation should be continued for an additional 15 minutes. If it is necessary to transport the patient to a physician and the eye needs to be bandaged, use a dry sterile cloth pad and cover both eyes.

Ingestion  ● If swallowed give 2-3 glasses of water if victim is conscious and alert. Do not give anything by mouth to an unconscious person. Do NOT induce vomiting. Seek immediate medical attention. Do not leave victim unattended. To prevent aspiration of swallowed product, lay victim on side with head lower than waist. If vomiting occurs and the victim is conscious, give water to further dilute the chemical. Persons attending the victim should avoid direct contact with heavily contaminated clothing and vomitus. Wear impervious gloves while decontaminating skin and hair.

4.2 Most important symptoms and effects, both acute and delayed
● Refer to Section 11 - Toxicological Information.

4.3 Indication of any immediate medical attention and special treatment needed

Notes to Physician  ● All treatments should be based on observed signs and symptoms of distress in the patient. Consideration should be given to the possibility that overexposure to materials other than this product may have occurred.

Section 5: Fire-Fighting Measures

5.1 Extinguishing media

Suitable Extinguishing Media  ● Not combustible. Use extinguishing media suitable for surrounding fire.
Unsuitable Extinguishing Media

- None known.

5.2 Special hazards arising from the substance or mixture

Unusual Fire and Explosion Hazards

Hazardous Combustion Products

- Oxides of sodium, oxides of phosphorus.

5.3 Advice for firefighters

- Fire fighters should wear complete protective clothing including self-contained breathing apparatus.
- Keep unauthorized personnel away.
- Stay upwind.
- Evacuate residents who are downwind of fire.
- Dike area to prevent runoff and contamination of water sources. Dispose of fire control water later.
- Persons who may have been exposed to contaminated smoke should be immediately examined by a physician and checked for symptoms of poisoning. The symptoms should not be mistaken for heat exhaustion or smoke inhalation.

Section 6: Accidental Release Measures

6.1 Personal precautions, protective equipment and emergency procedures

Personal Precautions
- Ventilate enclosed areas. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing.

Emergency Procedures
- Keep unauthorized personnel away. Dike spill using absorbent or impervious materials such as earth, sand or clay.

6.2 Environmental precautions

- Runoff from fire control may cause pollution. Prevent material from entering public sewer system or any waterways.

6.3 Methods and material for containment and cleaning up

Containment/Clean-up Measures

- Sweep or vacuum up and place in an appropriate closed container.
Clean up residual material by washing area with water and detergent. Collect washings for disposal.

6.4 Reference to other sections
- Refer to Section 8 - Exposure Controls/Personal Protection and Section 13 - Disposal Considerations.

Section 7: Handling and Storage

7.1 Precautions for safe handling
Handling • Avoid direct or prolonged contact with skin and eyes. Avoid breathing dust. Do not ingest.

8.2 Exposure controls

Engineering
Measures/Controls

● Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

Personal Protective Equipment

Respiratory ● Follow the OSHA respirator regulations found in 29 CFR 1910.134 or European Standard EN 149. Use a NIOSH/MSHA or European Standard EN 149 approved respirator if exposure limits are exceeded or symptoms are experienced.
Eye/Face ● Wear face shield and eye protection. An emergency eye wash must be readily accessible to the work area.

Hands ● Wear protective gloves.

Skin/Body ● Wear protective clothing

General Industrial Hygiene
Considerations
● Do not get in eyes or on skin or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, or using tobacco. Handle in accordance with good industrial hygiene and safety practice.

Environmental Exposure
Controls
● Follow best practice for site management and disposal of waste.
